

Minimally invasive with maximum precision

The PERI-LOC Locked Plating System Targeter provides precise screw placement. The Targeter aligns directly with the screw hole configuration of the plate.

PERI-LOC[®]
Periarticular Locked
Plating System

PERI-LOC[®] Targeter System for 4.5mm Lateral Proximal Tibia Locking Plate

The PERI-LOC System offers you these advantages

- Surgeon-friendly instrumentation features standardized drill bits, drill guides and screwdrivers to save time
- Precise, anatomical contouring
- Option of locking or non-locking screws in every hole
- Scalloped plate edges allow for independent lag screw placement enabling easier articular reduction
